

Recreational Fisheries Conservation Partnerships Program

C. Mitton-Wilkie

Fisheries and Oceans Canada, Burlington, ON, Canada

The Recreational Fisheries Conservation Partnerships Program (RFCPP) aims to bring like-minded partners and their resources together with the common long-term goal of enhancing the sustainability and ongoing productivity of Canada's recreational fisheries. This goal is achieved by restoring, rebuilding and rehabilitating recreational fisheries habitat. See www.dfo-mpo.gc.ca/habitat/rfcpp-ppcpr/index-eng.asp for additional program details. Information regarding the RFCPP and RFCPP funded projects that have incorporated natural channel designs will be presented
